

Weekly Topic Tasks for Year 2 w/c Monday 30.3.20

To finish our current topic on space, we would like you to look at the oil painting called **Starry Night** by the famous artist Vincent Van Gogh.

Monday	As an introduction, watch https://www.youtube.com/watch?v=qv8TANh8djI to find out more information about Vincent Van Gogh and his artwork. Which piece of art did you like the best and why? <i>Write descriptive sentences about what you can see, how it makes you feel, where you think it is, can you smell anything - use some great adjectives to make your writing really interesting.</i>
Tuesday	Today we would like you to draw your own interpretation of Starry Night using felt tips, coloured pencils, paint or whatever is available to you.
Wednesday	Vincent Van Gogh loved to paint self-portraits - why don't you have a try too... use a mirror to help you and think about what medium you want to use (pencil, paint, pastel).
Thursday	As we all enjoyed learning about constellations so much when we had the Planetarium visit, can you find out about one of the constellations we can see in the Northern Hemisphere? Draw and write about it.
Friday	To link in with our ICT curriculum we would like you to log on to your WeLearn account and in Purplemash find the program 2paint (children have used this program before to design their Mr Men characters) to create their own Starry Night painting.

When the opportunity arises and there is a clear night or two, please look out for the constellation you have researched.

Mathletics Top Tip: There are different math-based activities such as multiverse (times tables) and Rainforest Maths (mixed activities) available on **Mathletics online** (not the app version). Use your internet search engine to go to www.mathletics.com/uk/ and login the usual way. On your own home page click the green 'PLAY' button at the top. Then scroll down to find Mathletics apps and games.
