

Weekly Topic Tasks for Year 2 w/c Monday 4.5.20

Our new topic for this term is 'That's Incredible'. Our first focus is an Incredible Building with the focus being **Castles**.

Monday	Design & Technology This is a 3-day project which we hope you'll have fun making!
Tuesday	
Wednesday	<p>We'd like you to create your own model castle entrance with a drawbridge. We've put some simple instructions as photos from ones that we made previously to give you a bit of help. <i>(You might want to take pictures of each step so you can use these for the instruction writing activity on Thursday).</i></p> <p>You can now decorate your castle and add objects/characters such as knights, princesses, flags and cannons (you might want to use Lego figures too).</p> <p>Finally, use your imagination and create your own stories and adventures that will take place in your castle (in other words, play with it and have some fun!).</p>
Thursday	Instruction Writing We would now like you to write a set of instructions explaining how you made your castle entrance. Write instructions out like a recipe; starting off with the equipment that you needed. Then number each step and write your instructions using bossy language and time connectives.
Friday	Bank Holiday VE Day Celebrations - 75 years on Discuss with your grown-up why we are celebrating today and why this year is particularly significant for our war heroes.

Maths Extra Activity:

We'd like you to catch up with all of your Mathletics learning and aim to achieve 1000 points this week! Also have a go at using 'Live' Mathletics - you might even end up playing someone from Emscote!

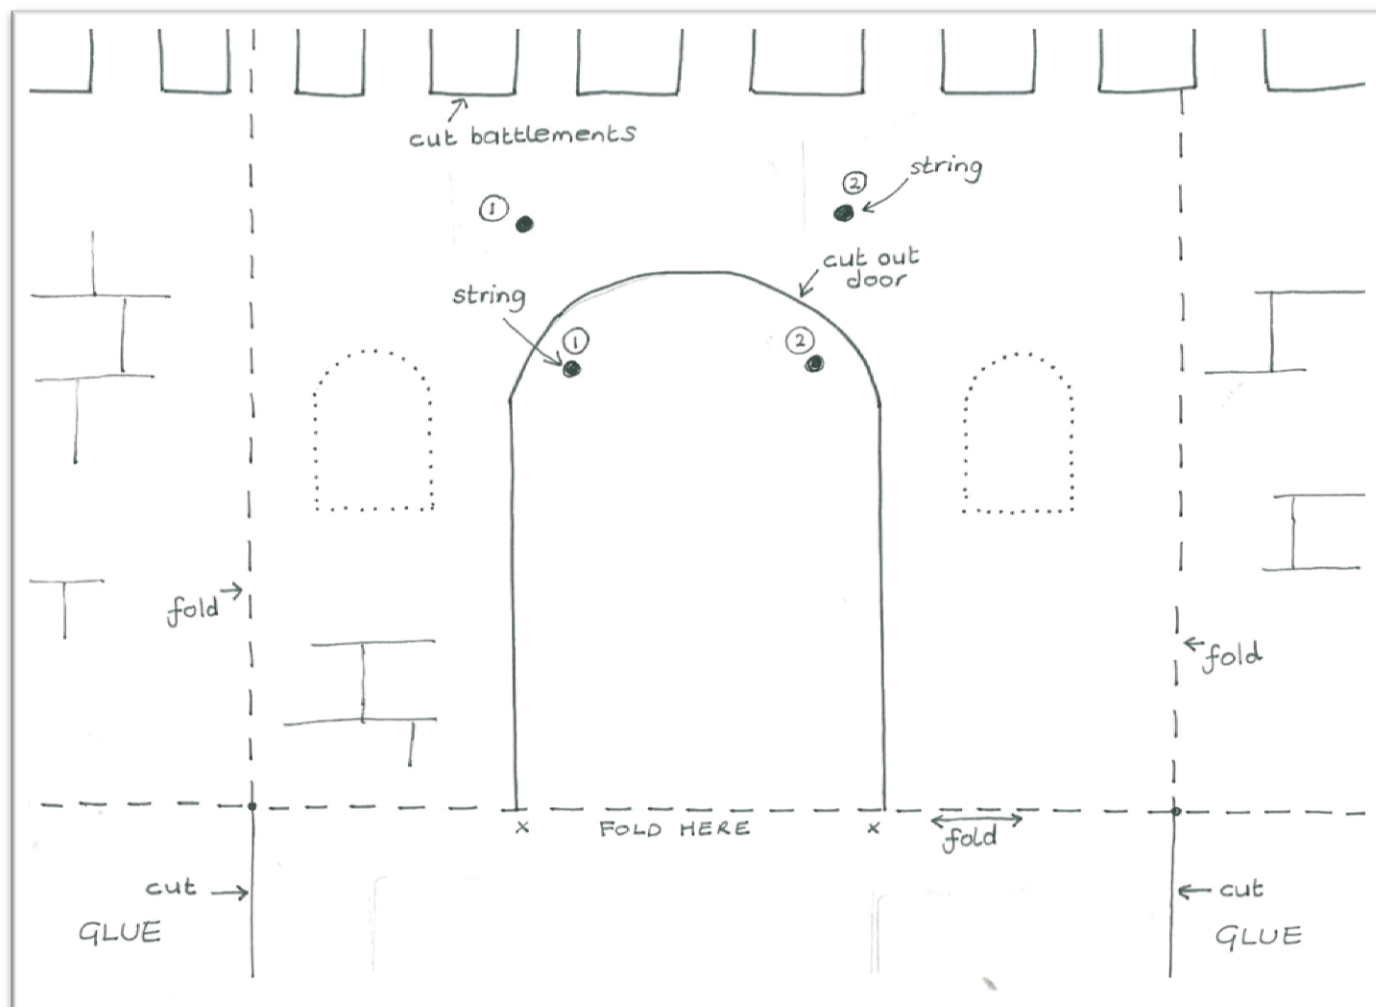

How to make a castle entrance and drawbridge

Follow the step by step images to create your own castle entrance with moving drawbridge!
You can choose to make your own castle if you'd prefer.

Equipment:

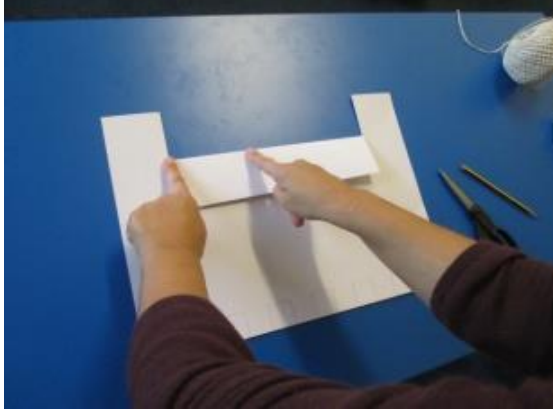

A4 or A3 piece of card, scissors, string or wool, colouring pencils.

This is a template of the castle showing folding and cutting lines.

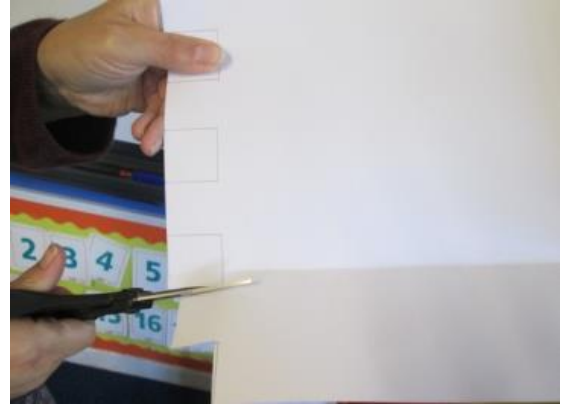

Instructions to make the castle entrance and drawbridge

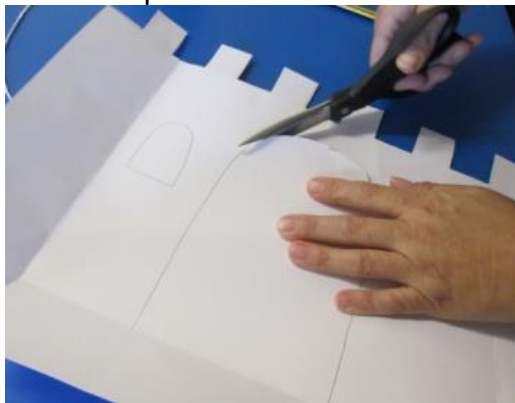

1. Draw the features as shown on the template. Cut 2 slits at the sides and fold.

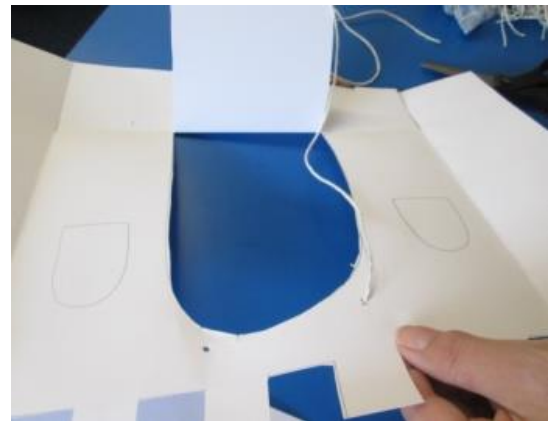

2. Cut the battlements out and fold in the sides.

3. Cut out the door - but not the bottom part of the door.

4. Attach a length of string to the top of the door and above the door & knot.

5. Draw additional features and decorate - windows, arrow slits, bricks.

6. Finally stick the bottom of each side to the base to finish your castle entrance!

Cut out and use these pictures to write your own instructions (or use your own photos if you took them whilst making your castle)

(avoid copying the information from the previous page!)
